DIAMATRIX LTD. LAUNCHES THE NEW X1 Ready-Loaded IRIS SPECULUM
New device is Ophthalmology's first ready-loaded pupil expander

THE WOODLANDS, TX – April 2, 2018 - Diamatrix LTD, innovator in ophthalmic surgical solutions, announces their newest device for the management of complicated cataracts. The X1 Ready-Loaded Iris Speculum is Ophthalmology's only ready-loaded, disposable iris speculum. The X1 is quickly becoming the premier tool for use in the management of complicated cataracts stemming from IFIS or dilation limiting factors.

Each X1 Ready-Loaded Iris Speculum is fully loaded with a XpandNT Iris Speculum during the manufacturing process. The XpandNT is a thin biocompatible Nitinol device that is uniquely flexible and "remembers" its shape through all surgical manipulations.

Pioneering surgeon Charles H Williamson, M.D. says the device is, "Absolutely the best pupillary expander available."

The XpandNT ring delivers 6.7mm of near circular, mechanical dilation without pinching the iris margin. Additionally, the smarter design allows for easier rotation and a clearer pathway for instruments. Overall, the device is superior to any pupillary expansion device currently on the market.

The X1 Ready-Loaded Iris Speculum is a single-use, sterile device, packaged with 4 devices per box. Additionally, Diamatrix offers optional surgical instrumentation to assist with the intraoperative placement of the device.

For more information, or to setup a clinical evaluation, call 800.867.8081 or visit info.diamatrix.com/x1-iris-speculum.

About Diamatrix

Diamatrix Ltd strives for Quality, Value, and Innovation. We achieve these ideals by working in partnership with ophthalmic surgeons and staff to introduce patented technology, such as our Sharps Snap-Safe™ safety handle, E-series diamond knife and our newest product; the XpandNT®.

We help drive value to hospitals, surgery centers, and physician-owned ASCs by promoting the proper care and cleaning of instruments and carry a full line of products that extend the life of these exquisite devices.
